Research Roadmap
Overall challenges
Property-based and Metamorphic Testing
Test Adequacy Metrics
Synthetic Persona Generation
Formalizing Test Objectives
Specification Modeling
Fault Injection and Chaos Engineering
Agent-specific Test Infrastructure
Testing agentic systems including external deps
Non-determinism
Lack of support to represent various end-user personas
Gaps in formal test objectives
Generating complex/realistic test scenarios
Poor support for NFR testing
Lack of adequacy metrics
Lack of testing infrastructure
Lack of Automated Test Generators
Lack of behavioral testing
Tackling framework abstraction
Observability support as first-class citizen
